HISTORY OF PARKER OFFSHORE

Parker Offshores' simple philosophy and strong work ethic continue to be a prominent guiding force since Linwood Parker founded the company in the late 1960s. Linwood's old-fashioned values of honesty, hard work, and dedication to doing the right thing have been at the helm from the beginning. The philosophy of simplicity, strength, and seaworthiness has embodied the traditional design and lasting value which comes with every Parker boat.

Parker is located near the coastal Outer Banks of North Carolina in the 300-year-old seaport of Beaufort. It is an area world-renowned for over 200 years of traditional handcrafted, custom boat building. Along the demanding coastal waters commonly called "The Graveyard of the Atlantic," boats are of necessity, built to be seaworthy, versatile, and reliable. Linwood realized the value of the area's rich traditional boat-building heritage early in his career. He found it to be born into the local population, which now comprises the Parker workforce.

Linwood was a commercial fisherman and a builder of large, handcrafted custom commercial boats for over 20 years. Linwood experienced first-hand why the no-nonsense priorities of simplicity, strength, and seaworthiness were so important. This straightforward legacy has been passed on and preserved in an expanding line of 18' to 29' fiberglass boats.

Parker has enjoyed uninterrupted production since the late 1960s. Parker never intended to become an industry giant but build boats for the market portion that can recognize the essential qualities in boats dictated by common sense and time-tested design features. Today Parker operates in a modern, state-of-the-art 225,000-square-foot production facility that compares with the finest in the industry. Taking pride in its in-house capabilities for the entire boat-building process, from initial design and prototyping through construction, assembly, testing, and shipping. All Parker boats are hand-laid from the finest roll stocks and resins available. The deck hardware is thru-bolted stainless steel. No detail is ever too small to be considered unimportant in a Parker boat. Using this foundation of careful tooling, highest-quality construction practices, and superior artisanship has earned Parker its reputation. In 2019, Parker became a member of the Correct Craft family. Correct Craft is a strategic plan-driven company that highly values its culture. That is why we focus heavily on our identity pyramid that captures both what is important to the company and how we conduct ourselves. Our focus remains on people, performance, and philanthropy.

Parker's straightforward approach to its product and philosophy of boat building, combined with its knowledge of who it is building boats for, translates very simply. We are not trying to be everything to everyone. At Parker, our boats are built for the boater who seeks maximum value without spending a fortune. Our focus is on providing boats that perform dependably, without constant maintenance and attention, boats whose wide-flared bows and classic lines are pleasing to the eye and fulfilling, and most importantly, boats that are rewarding to own and operate.

ABOUT CORRECT CRAFT

Correct Craft

Making Life Better

Celebrating 96 years of excellence in the marine industry, Correct Craft is a Florida-based company with global operations. Walter C. Meloon created the Florida Variety Boat Company in 1925. Focused on “Making Life Better,” the Correct Craft family includes Nautique, Centurion, Supreme, Bass Cat, Yar-Craft, SeaArk, Parker, and Ingenuity boat companies, Pleasurecraft Engine Group, Indmar Marine Engines, Velvet Drive Transmissions, Mach Connections, Merritt Precision, Osmosis, Watershed Innovation, and Aktion Parks. For more information, please visit www.correctcraft.com.
